Examiner: Yuan      S.N. 10/621,372      Art Unit: 1745      May 17, 2007

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 6, 2007 has been entered. Claim 1 was amended. Claims 2, 6,17-21 were cancelled.
  
2. The text of those sections of Title 35, U.S.C. code not included in this action can be found in the prior Office Action issued on December 14, 2006.

***Claim Rejections***

3. The claim rejections under 35 U.S.C. 103(a) as obvious over Warszawski et al. in view of Cisar et al. on claims 1-4,7,8,10-13 are withdrawn because the independent claim 1 has been amended. The claim rejections under 35 U.S.C. 103(a) as obvious over Warszawski et al., Cisar et al. and Kao et al. on claims 5,6,14-16 have been withdrawn because the independent claim 1 has been amended. Support for the amendment can be found in Figures 8 and 9 of the instant specification.

***Reasons for Allowance***

4. Claims 1,3-5,7-16 are allowed. The invention of independent claim 1 recites a stack structure of a fuel cell comprising a plurality of separators, a protruding portion which is formed on an end portion of each of the separators, a plurality of cells of which comprises the separators and a membrane-electrode assembly, wherein the protruding portions of the separators adjacent to each other are formed as to be displaced with respect to each other in the cell stacked direction and offset from one another in the direction perpendicular to the cell stacked direction. The closest prior art of record, Warszawski et al., Cisar et al., Desanctis et al. and Kao et al., does not teach the protruding portions of the separators adjacent to each other are formed as to be displaced with respect to each other in the cell stacked direction and offset from one another in the direction perpendicular to the cell stacked direction as recited in the claim.
